

Opening Dorico Pro as SE or Elements

All three desktop versions of Dorico use the same file; the license you have determines which program is opened. However – if you have Pro, it **is** possible to open Pro as if it were Elements or SE.

For SE: Hold down the Ctrl key (Windows) or Command key (Mac) then double click the Dorico icon,

For ELEMENTS: Double click the Dorico icon, then **immediately** hit the Alt key (Windows) or Option key (Mac). You have to be very fast with hitting the Alt / Option key, or it won't work.
