

## Display Full Staff Names, Abbreviated Staff Names, or None.

Settings that control display of staff names are in the Layout Options Dialog, under “Staves and Systems”. To access it: Library Menu / Layout Options – or Ctrl-Shift-L on Windows, Cmd-Shift-L on Mac.

If using my template these settings should already be there, but here they are. They are the settings typically used in barbershop.

- Staff labels on first system: select “Full”
- Staff labels on subsequent systems: select “None”.

Click Apply then click Close.
