
Open Dorico Pro as SE or Elements

All three desktop versions of Dorico use the same file; the license you have determines which program is opened. However, if you have Pro, it **is** possible to open Pro as if it were Elements or SE.

Windows

SE:

- Hold down the Ctrl key
- Double click the Dorico icon
- Let go of the Ctrl key.

Elements

- Hold down the Alt key
- Right click on the Dorico icon
- Select Open
- Let go of the Alt key

Mac

- SE: Press the command key while launching.
- Elements: Press the option key while launching.
